7. ASSESSMENT OF ADDITIONAL AWCs IN EAST, NORTH EAST AND NORTH WEST-I DISTRICT OF DELHI

Introduction:

Population data was requested from the Municipal Councilors of Municipal Wards of East, North East and North West-I districts of Delhi through personal visits and approximate primary information was collected.

The municipal ward wise data analysis was conducted and analysed in the light of existing AWCs in each area and additional AWCs required were assessed on the basis of criteria mentioned earlier. The listing of existing AWCs against the colonies in the municipal wards was done in consultation with supervisors, Incharge of AWCs and CDPOs, incharge of the Projects.

The data was subjected to three different levels of analysis.

- **First Level Analysis-** it dealt with the assessment of the need for AWCs in an area or withdrawal of AWCs if operational in the Colony/Slum/J.J.Cluster indicated in the Municipal Ward as per the economic status of the population in that colony and also the population covered by AWCs.

This analysis identified the areas inadequately covered by ICDS, uncovered by ICDS and additional number of AWCs required in each ward.

- **Second Level Analysis-** Area "inadequately covered" and "uncovered" by AWCs in Municipal Ward were aggregated to arrive at the consolidated number of additional AWCs required in the Municipal Wards.

- **Third Level Analysis-** Kachhi Slums and J.J.Clusters were aggregated ward wise to arrive at additional AWCs required to cover all Kachhi Slums and J.J.Clusters.

7.A. ASSESSMENT OF ADDITIONAL AWCs IN AREA EAST, NORTH EAST AND NORTH WEST-I DISTRICTS OF DELHI

**EAST AND NORTH EAST DISTRICTS
Data Analysis-First Level**
